PROFESSIONAL SUMMARY

Third-year Computer Engineering Diploma student at Government Polytechnic, Pune, with hands-on experience in Python backend development, REST APIs (FastAPI, Flask), web scraping, SQL databases, and data security. Built projects across web, Android, cloud storage, and AI/ML, including a legal-assistance platform with multilingual NLP. Seeking an internship to apply software development and data engineering skills to real-world problems.

EDUCATION

Diploma in Computer Engineering – Government Polytechnic, Pune | 2024 – 2027 | Second-Year Average: 93.01%
Secondary School Certificate (SSC) – New English Medium School, Pune | 2024 | 94.00%

TECHNICAL SKILLS

Programming: Python, Java, C++, C, SQL, JavaScript (Basic)
Backend & Databases: FastAPI, Flask, REST APIs, PostgreSQL, MySQL, SQLite, Pandas, NumPy, JSON, CSV
Frontend & Apps: React.js, HTML, CSS, Vite, Tailwind CSS, Android Studio, XML, Tkinter, Streamlit
AI, NLP & Documents: Scikit-Learn, Data Mining, WEKA, Multilingual Translation, OCR, PDF Extraction, OpenCV, PyMuPDF
Scraping & Automation: Selenium, BeautifulSoup, Requests, HTML Parsing, Software Testing Fundamentals
Security & Cloud: SHA-256, File-Integrity Verification, Access Control, GCP, Google Cloud Storage, File Replication
Networking & Tools: Cisco Packet Tracer, Wireshark (Basic), Git, GitHub, VS Code, IntelliJ, Ubuntu, WSL, Arduino

PROJECTS

NyayMitra – AI-Powered Legal Assistance Platform | github.com/tanishka8108/NyayMitra
React, TypeScript, Vite, Tailwind CSS, FastAPI, Python, Selenium, BeautifulSoup, Requests, SQL

- Developed and maintained FastAPI backend endpoints for CNR-based case lookup, search and filtering, case details, party information, case timelines, and court orders.
- Built web-scraping modules to extract and structure eCourts data (parties, acts, FIR, hearing timelines, PDFs) with JSON and CSV export.
- Integrated multilingual NLP, document processing, and AI features into backend data handling; resolved API bugs and improved error-handling workflows.

DecentraCloud – Decentralized Cloud File-Sharing System | github.com/tanishka8108/decentracloud
Python, Flask, GCP, Google Cloud Storage, SQLite, SHA-256

- Built a cloud file-sharing system with SHA-256 hash verification, replication across three Google Cloud Storage buckets, SQLite persistence, access controls, and a hash-chain audit ledger.

Refugio – Android Wellbeing Application | github.com/kanak2142/refugio-android-app
Java, XML, Android Studio, Android SDK, SQLite, SharedPreferences, MediaPlayer

- Built an Android app with account registration, breathing and grounding exercises, a 60-second Quiet Moment, mood check-ins, and streak tracking, using local SQLite and SharedPreferences storage.

Deadlock Detection System | github.com/tanishka8108/Deadlock-Detection-and-Management-System
Python, NumPy, scikit-learn, Streamlit

- Built a Streamlit app to analyze deadlock detection and resource allocation with graph visualizations.

Code and Escape – Java-Based Escape-Room Coding Game | github.com/kanak2142/CodeandEscape
Java, MySQL

- Developed a coding-themed escape-room game integrating Java application logic with a MySQL database.

Fake News Detection System (Coronavirus News)
Python, Scikit-Learn, Pandas, NumPy, WEKA

- Built a classifier to detect fake and real coronavirus news; used WEKA for visual insights and evaluation.

ChemQuest – Interactive Periodic Table | github.com/kanak2142/Interactive-Periodic-Table
Python, Tkinter / Web Technologies

- Built an interactive periodic table; clicking any element shows its chemical and atomic details.

Other Projects: Luma AI / Open Sky (Assistive Smart Glasses Concept), Serenewoods, Airline Management System, Air Monitoring System, Restaurant Management System, Smart Expense Tracker.

LANGUAGES

English ●●●●● Fluent **Marathi** ●●●●● Native **Hindi** ●●●●● Fluent **German** ●○○○○ A1, pursuing A2

CERTIFICATIONS & COURSES

- **C++ Object-Oriented Programming:** Six-course series | **IBM SkillsBuild:** AI Fundamentals
- **Infosys Springboard:** Software Engineering (10/2026), IoT 101 (02/2026), Python Fundamentals (03/2026)

HACKATHONS & ACTIVITIES

- **VES Technothon:** Qualified Round 1 with team for Open Sky / Luma AI smart-glasses concept (10/2025)
- **MindSpark '25 (COEP Tech University):** Participated in GooGler, Code Junkie, and Sherlocked
- **ASCOD DevSprint 2025 (GP Pune):** Participated in back2Hack '26 (UNLEASH '26), Buzzer Quiz, and Treasure Hint
- **Kathak:** Trained up to Madhyama Pratham (Gandharva Mahavidyalaya); dance performances and choreography
