ABOUT ME

Third-year Computer Engineering diploma student at Government Polytechnic, Pune, with hands-on experience in Python backend development, REST APIs, web scraping, SQL, cloud storage, data security, and AI/NLP projects. Seeking a software development or data engineering internship.

EDUCATION

Government Polytechnic, Pune | *Diploma in Computer Engineering* | 2024–2027 | Second-Year Average: 93.01%
New English Medium School, Pune | *SSC* | 2024 | 94.00%

TECHNICAL SKILLS

Programming:	Python, Java, C, C++, SQL, JavaScript (Basic)
Frontend & APIs:	HTML, CSS, React, TypeScript, Vite, Tailwind CSS, Flask, FastAPI, REST APIs
Apps & Data:	Android, Android Studio, XML, Tkinter, Streamlit, SQLite, MySQL, PostgreSQL, Pandas, NumPy, openpyxl, JSON, CSV
AI, NLP & Documents:	Scikit-learn, WEKA, Google Colab, PaddleOCR, OCR, PDF extraction, OpenCV, PyMuPDF, multilingual NLP, introductory NLP, multilingual translation, legal-text simplification, AI/ML fundamentals, data mining, Genetic Algorithms
Cloud, Security & Systems:	GCP, Google Cloud Storage, Cloud Computing, Distributed File Storage, SHA-256, file-integrity verification, access control, blockchain-based audit ledgers, Banker's Algorithm, deadlock detection, Computer Networks, Ubuntu, WSL
Tools & Testing:	Selenium, BeautifulSoup, Requests, HTML parsing, web scraping, Matplotlib, NetworkX, Git, GitHub, VS Code, IntelliJ, Gradle, Tinkercad, Arduino, Wireshark (Basic), Cisco Packet Tracer, Ubuntu, WSL, software testing fundamentals

PROJECTS

NyayMitra — AI-Powered Legal Assistance Platform | github.com/tanishka8108/NyayMitra
Technologies: *React, TypeScript, Vite, Tailwind CSS, FastAPI, Python, Selenium, BeautifulSoup, Requests, SQL*
- Developed FastAPI endpoints for CNR-based case lookup, search/filtering, case details, party information, timelines, and court orders.
- Scraped and structured ~500 eCourts cases, including parties, acts, FIR details, hearing timelines, and PDFs.
- Exported structured data to JSON/CSV and exposed records through APIs; integrated multilingual NLP, document processing, and AI features.
- Resolved API bugs and improved error handling; contributed to Data Engineering, Lawyer Suggestion, and Data Security.

DecentraCloud — Decentralized Cloud File-Sharing System | github.com/tanishka8108/decentracloud
Technologies: *Python, Flask, GCP, Google Cloud Storage, SQLite, SHA-256*
- Built cloud file sharing with SHA-256 integrity verification, replication across three GCS buckets, SQLite persistence, access controls, and a hash-chain audit ledger.

Refugio — Android Wellbeing Application | github.com/kanak2142/refugio-android-app
Technologies: *Java, XML, Android Studio, Android SDK, SQLite, SharedPreferences, MediaPlayer*
- Developed 17 activity screens with registration, local storage, breathing and grounding exercises, a 60-second Quiet Moment, calming audio, mood check-ins, and streak tracking.

Deadlock Detection System | github.com/tanishka8108/Deadlock-Detection-and-Management-System
Technologies: *Python, NumPy, Pandas, NetworkX, Matplotlib, Streamlit*
- Implemented Banker's Algorithm safety checks and safe-sequence output, deadlock detection, resource-request grant/deny checks, and graph visualizations for up to 10 processes and 10 resource types.

Code and Escape — Java-Based Escape-Room Coding Game | github.com/kanak2142/CodeandEscape
Technologies: *Java, MySQL, JDBC*
- Built backend game logic using the Factory pattern for six puzzle types across three rooms, with JDBC integration and a six-table MySQL schema.

Fake News Detection System (Coronavirus News)
Technologies: *Python, scikit-learn, Pandas, NumPy, WEKA*
- Built a classifier to distinguish fake from real coronavirus news using Python data processing and WEKA visualizations and performance evaluation.

ChemQuest — Interactive Periodic Table | github.com/kanak2142/Interactive-Periodic-Table
Technologies: *Python, Tkinter / Web Technologies*
- Developed an interactive periodic table displaying chemical and atomic details when an element is selected.

Other Projects: Luma AI / Open Sky, Serenewoods, Airline Management System, Air Monitoring System, Restaurant Management System, Smart Expense Tracker.

CERTIFICATIONS

Infosys Springboard: Python Fundamentals, Internet of Things 101, C++ OOP course series (six courses)
Other relevant: Skillsup Software Testing, IBM SkillsBuild AI Fundamentals, EY & Microsoft AI Skills Passport

EXTRACURRICULAR & ACHIEVEMENTS

VES Technothon: Qualified for Round 1 with the Open Sky smart-glasses team.
MindSpark'25: GooGler, Code Junkie, and Sherlocked.
ASCOD DevSprint 2025: Buzzer Quiz and Treasure Hunt.
Kathak: Training through Gandharva Mahavidyalaya up to Madhyama Pratham.

LANGUAGES

English, Hindi, Marathi (speaking, reading, writing), German A1 (A2 in progress).

SOFT SKILLS

Problem-Solving, Teamwork, Communication, Adaptability, Attention to Detail, Continuous Learning.
